Global Data Harmonization
Data Modules and Core Questions / Variables for
Pregnancy & Perinatal COVID-19 Registries or Cohorts
(Last Updated November 8, 2020)

Prepared by Emily R. Smith¹ (EmilySmith@GWU.edu) and Siran He¹, in collaboration with Yalda Afshar² and Valerie Flaherman³

Updated by Emily R. Smith¹, Siran He¹, Erin Oakley¹, Mollie Wood⁴

¹Department of Global Health, Milken Institute School of Public Health at The George Washington University, Washington, D.C., U.S.A. ²Department of Obstetrics and Gynecology, University of California, Los Angeles, ³Department of Pediatrics, University of California, San Francisco, ⁴Cincinnati College of Medicine, Cincinnati

Objective: Our objective is to provide a harmonized set of high priority, core questions / variables for pregnancy and perinatal COVID-19 registry or cohort studies. These are not intended to be a survey or case report form. Each study has or will develop local protocols and data collection forms. However, each study will ideally collect the data outlined here. This will enable future collaborations to answer high priority questions or to pool data where studies investigators are willing and able.

Harmonization Process: We developed the draft data modules and questions based on a proposed set of questions from the PRIORITY study. We also reviewed and included questions from the data collection forms developed by the World Health Organization (WHO) and the U.S. Center for Disease Control (CDC). We requested feedback via a survey and by email from the >50 participants of the bi-monthly “Perinatal COVID-19 Global Gathering”. The current data modules reflect feedback and general consensus among survey respondents.

Which studies should harmonize data? Any registry or cohort study collecting data regarding pregnant or postpartum people suspected or confirmed to have COVID-19 (as well as their fetus / infant) should consider collecting harmonized data, whether or not they are population-based. The studies may collect data from health records, by directly questioning the participant, or both. Differences in the way participants are sampled/recruited or the way data is collected can be reconciled when specific data analyses are planned.

Participant Inclusion Criteria: Participants enrolled in the study should meet the following inclusion criteria:

- Pregnant person, or person who was pregnant within the past 6 weeks (Note: 42 days/6weeks reflects the postpartum period / maternal mortality definition);
- diagnosed with (or suspected to be infected with) COVID-19;
- provides informed consent.
What is a Data Module: We define a "Data Module" as a group of questions (variables) that: 1) are thematically related; 2) are asked at the same time and with the same frequency; 3) AND refer to EITHER mother or baby (not both). These modules are organized for the purpose of prioritizing variables and themes, and do NOT reflect the order in which they should/would appear in actual data collection forms.

Updates: Updates to the data modules in August and September 2020 reflect efforts to harmonize these modules with updated World Health Organization (WHO) case definitions and ongoing multi-site study protocols developed by WHO. Additions are highlight in yellow. Questions that have been removed are crossed out.

Core Data Modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Research Objective</th>
</tr>
</thead>
</table>
| **Module 1:** Maternal COVID-19 Information 
(n=14 questions) | To evaluate the clinical presentation and natural history of disease for women infected with (or suspected to be infected with) COVID-19 who are pregnant or have been pregnant within the last 6 weeks / 42 days. (e.g., symptoms, testing, treatment, clinical course) |
| **Module 2:** Pregnancy Status & Pregnancy-Related Morbidity 
(n=14 questions) | To confirm pregnancy status and to document pregnancy-related basic information among women infected with COVID-19 (e.g., due date, singleton/multiple pregnancy, etc.) |
| **Module 3:** Pregnancy Outcomes 
(n=5 questions) | To document the endpoint of the registered pregnancy among women infected with COVID-19 (e.g., abortion, stillbirth, live birth, etc.) |
| **Module 4:** Birth Characteristics 
(n=15 questions) | To document various characteristics related to live birth. (e.g., place of birth, birthweight, gestational age, etc. Information about the infant, if recorded during/right after delivery, will be in this module) |
| **Module 5:** Infant Morbidity & Mortality 
(n=8 questions) | To evaluate infant outcomes among those born to women who have had COVID-19 (if live birth) (e.g., COVID-like symptoms up till 12mo, etc.) |
| **Module 6:** Core socio-demographic information 
(n=6 questions) | To identify high-risk subgroups with increased pregnancy, delivery, and infant adverse outcomes that are potentially associated with COVID-19 |
| **Module 7:** Biospecimens and Diagnostic Testing 
(n=unlimited responses based on collected samples) | To clearly document all biospecimens collected related to COVID-19 in a pregnancy and delivery and diagnostic testing for COVID-19 completed for the mother and infant, with a focus on identifying any instances of vertical transmission of COVID-19. |
Time intervals (e.g. gestational age, time from symptom onset to testing) should be calculated directly from dates where possible. **The dates (and ages) recorded in these modules include:**

- Module 1-Q1: Date of onset of COVID-like symptoms
- Module 1-Q3: Date of COVID diagnosis
- Module 1-Q8: Date of hospital admission
- Module 1-Q13: Date of ICU admission / critical care receipt
- Module 2-Q1: Date of study/registry enrollment
- Module 2-Q4: Expected date of delivery
- Module 3-Q1: Date of pregnancy outcome
- Module 3-Q4: Date of maternal death
- Module 4-Q1: Date of birth & time of birth
  - Same as Module 3-Q1 (if live birth)
- Module 4-Q6: Infant gestational age estimation
  - Note this question asks about estimation method, which is important in order to address measurement error in analysis stage
- Module 4-Q14: Date of facility discharge after birth (for infant)
- Module 5-Q2: Date of neonatal death
- Module 5-Q4: Date of neonatal COVID-19 signs/symptoms
- Module 7-Q2a: Collection date of maternal biospecimen(s)
- Module 7-Q4a: Collection date of biospecimen(s) at delivery
- Module 7-Q6a: Collection date of neonatal/infant biospecimen(s)

**Module 1: Maternal COVID-19 Information**

**What:** COVID symptoms, testing, treatment, clinical course

**When:** At regular interval until disease resolution or chart abstraction

<table>
<thead>
<tr>
<th>Questionnaire-based data collection</th>
<th>Medical record data extraction</th>
</tr>
</thead>
</table>
| **Q1. Date of onset of COVID-like symptoms (DD:MM:YY)** | **Q1. Extract from medical record:**
  - First date of COVID-like symptoms (DD:MM:YY) |
| **Q2. Have you been diagnosed with COVID-19?**
  - Yes, laboratory confirmed COVID-19
  - Yes, probable COVID-19 case (see 2a)
  - Suspected COVID-19 case (see 2b)
  - No, COVID-19 negative | **Q2. Extract from medical record:**
  - COVID-19 diagnosis notes:
    - Laboratory Confirmed
    - Probable COVID-19 case (see 2a)
    - Suspected COVID-19 case (see 2b)
    - No, COVID-19 negative |
| **Q2a. If diagnosed as a probable COVID-19 case, by which criteria were you diagnosed?**
  - A patient who meets clinical criteria above AND is a contact of a probable or confirmed case, or epidemiologically linked to a cluster with at least one confirmed case. | **Q2a. If diagnosed as a probable COVID-19 case, by which criteria was diagnosis made?**
  - A patient who meets clinical criteria above AND is a contact of a probable or confirmed case, or epidemiologically linked to a cluster with at least one confirmed case. |
- A suspect case with chest imaging showing findings suggestive of COVID-19 disease
- A person with recent onset of anosmia (loss of smell) or ageusia (loss of taste) in the absence of any other identified cause.
- Death, not otherwise explained, in an adult with respiratory distress preceding death AND was a contact of a probable or confirmed case or epidemiologically linked to a cluster with at least one confirmed case.

Q2b. If diagnosed as a probable COVID-19 case, by which criteria was diagnosis made?
- A person who meets the clinical AND epidemiological criteria by WHO
- A patient with severe acute respiratory illness

Q3. If answered “Yes” to Q2:
- Date of COVID-19 diagnosis (DD:MM:YY)

Q3. Extract from medical record:
- Date of COVID-19 diagnosis, or Date PUI status was documented (DD:MM:YY)

Q4. What symptoms did you have that led you to be tested or suspected of Coronavirus/COVID19? (Check all that apply)
- Fever
- Cough
- Shortness of breath
- Dizziness or fainting
- Body aches
- Runny nose
- Sore throat
- Loss of sense of smell
- Loss of sense of taste
- Sneezing
- Fatigue
- Nausea
- Vomiting
- Diarrhea
- Headache
- Other symptoms (please specify)
- None / Asymptomatic

Q4. Extract from medical record:
- All symptoms listed in the record that are related to COVID investigation / diagnosis

Q5. Do you work in healthcare or provide direct patient care?
- Yes
- No
- Other, please specify

Q5. Extract from medical record:
- If occupation data is available,
  - Note down “Y” for healthcare/direct patient care,
  - “N” for other occupations,
  - “NA” for unknown

Q6. Have you received any medication for the treatment of COVID-19 (e.g. anti-viral, immunomodulators, convalescent plasma, IL6 mAb, other)
- Yes, I have
- No, I have not
- Maybe / uncertain
- Other, please specify

Q6. Extract from medical record:
- Has the patient been given any medication for the treatment of COVID-19
  - Yes
  - No
  - Other, please specify
Q7. If answered “Yes” to Q6: if possible, document more details about the medication:
- Type / Name
- Dose
- Duration
- Indications
- Clinical trial registration

Q7. Extract from medical record:
- Details about COVID-19 treatment regime, including medications, dose, duration, clinical trial inclusion, etc.

Q8. Were you ever admitted to the hospital for COVID-19
- Yes
- No
- Unknown

Q8. Extract from medical record: Ever admitted to the hospital for COVID-19
- Yes
- No
- Unknown

Q9. If answer “Yes” to Q8: What was the date of hospital admission? (DD:MM:YY)

Q9. Extract from medical record: What was the date of hospital admission? (DD:MM:YY)

Q10. If answer “Yes” to Q8: What was the date of hospital discharge? (DD:MM:YY) (in the case of death, enter date of death).

Q10. If answer “Yes” to Q8: Extract from medical record: What was the date of hospital discharge? (DD:MM:YY) (in the case of death, enter date of death).

Q11. If answer “Yes” to Q8: what was the respiratory status of the patient while hospitalized?
- Self ventilating in room air
- Self ventilating with oxygen support
- Non-invasive respiratory support (CPAP, NIV)
- Mechanically ventilated, intubation
- Unknown

Q11. If answer “Yes” to Q8: Extract from medical record: what was the respiratory status of the patient while hospitalized?
- Self ventilating in room air
- Self ventilating with oxygen support
- Non-invasive respiratory support (CPAP, NIV)
- Mechanically ventilated, intubation
- Unknown

Q12. If answer “Yes” to Q8: Was the mother admitted to an intensive care unit (ICU) or administered critical care for COVID-19?

Q12. If answer “Yes” to Q8: Extract from medical record: Was the patient admitted to an intensive care unit (ICU) or administered critical care for COVID-19?

Q13. If answer “Yes” to Q12: What was the date of ICU admission / critical care? (DD:MM:YY)

Q13. If answer “Yes” to Q12: Extract from medical record: What was the date of ICU admission / critical care? (DD:MM:YY)

Q14. If answer “Yes” to Q8: What was the date of ICU discharge / end of critical care? (DD:MM:YY) (in the case of death, enter date of death).

Q14. If answer “Yes” to Q8: Extract from medical record: What was the date of ICU discharge / end of critical care? (DD:MM:YY) (in the case of death, enter date of death).

---

Module 2: Pregnancy Status & Pregnancy-Related Morbidity

What: Pregnancy registration information and non-COVID morbidity among participants
When: At pregnancy registration

<table>
<thead>
<tr>
<th>Questionnaire-based data collection</th>

</thead>
<tbody>
<tr>
<td>Q1. Date of study enrolment (DD:MM:YY)</td>
<td>Q1. Extract from medical record:</td>
</tr>
<tr>
<td>Question</td>
<td>Description</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
</tr>
</tbody>
</table>
| Q2. Status upon enrolment | Date of study enrolment (DD:MM:YY)  
- Pregnant (confirmed by healthcare provider), not in labor  
- Pregnant (not confirmed by healthcare provider), not in labor  
- Pregnant in labor  
- Postpartum [days] --> if yes, breastfeeding Y/N  
- Post-abortion, miscarriage  
- Pregnancy status:  
  - Pregnant (confirmed by healthcare provider) not in labor  
  - Pregnant in labor  
  - Postpartum [days] --> if yes, breastfeeding Y/N  
  - Post-abortion, miscarriage  
- Extract from medical record:  
  - Pregnancy status:  
    - Breastfeeding status for postpartum women  
- Extract from medical record:  
  - Method of gestational age assessment |
| Q3. If answered “postpartum” in Q2: are you breastfeeding? |  
- Yes  
- No  
- Extract from medical record:  
  - Breastfeeding status for postpartum women  
- Extract from medical record:  
  - Method of gestational age assessment |
| Q4. What is your due date (expected date of delivery)? |  
- DD/MM/YYYY = Date  
- 08/08/1908 = Unknown  
- 09/09/1909 = Not applicable  
- Extract from medical record:  
  - Gestational age at enrollment |
| Q5. If answered “Yes” to Q4: |  
- What is the method of due date assessment?  
- Extract from medical record:  
  - Method of gestational age assessment |
| Q6. Number of fetuses: |  
- Singleton  
- Twins  
- Triplet  
- Higher order  
- Extract from medical record:  
  - Number of fetuses |
| Q7. (Pre-pregnancy) BMI (can document BMI or weight and height): |  
- Weight (Kg)  
- Height (m)  
- Extract from medical record:  
  - Pre-pregnancy weight and height (if available, be sure to note down units)  
- Extract from medical record:  
  - At the time of clinical visit, weight and height (if available, note down units) |
| Q8. (At the time of registration) BMI (can document BMI or weight and height): |  
- Weight (Kg)  
- Height (m)  
- Extract from medical record:  
  - At the time of clinical visit, weight and height (if available, note down units) |
| Q9. Gravidity: Is this your first pregnancy? |  
- Yes  
- No  
- Extract from medical record:  
  - Gravidity information |
| Q10. If answered “No” to Q9: |  
- How many times have you been pregnant?  
- Extract from medical record:  
  - Parity information  
- Extract from medical record:  
  - List all pregnancy-related conditions documented in the record |
| Q11. Parity: Is this your first child birth? |  
- Yes  
- No  
- Extract from medical record:  
  - Parity information |
| Q12. If answered “Not” to Q11: |  
- How many live births have you had previously?  
- Extract from medical record:  
  - List all pregnancy-related conditions documented in the record |
| Q13. Has a doctor or other healthcare provider told you that you have any of the following conditions before you were pregnant? (check all that apply) |  
- (local sites should document)  
- Extract from medical record:  
  - List all pregnancy-related conditions documented in the record |
**Module 3: Pregnancy Outcomes**

What: Information about how the pregnancy ended; maternal mortality will be recorded in this module

When: Once, after pregnancy outcome is known

<table>
<thead>
<tr>
<th>Questionnaire-based data collection</th>
<th>Medical record data extraction</th>
</tr>
</thead>
</table>
| Q1. Date of pregnancy outcome (DD:MM:YY)  
[Allows calculation of gestational age (in weeks) when pregnancy ended] | Q1. Extract from medical record:  
• Date of pregnancy outcome (DD:MM:YY) |
| Q2. Please indicate the end point of this pregnancy:  
• Live birth | Q2. Extract from medical record:  
• The end point of this pregnancy (note down) |
- Stillbirth
- SAB (spontaneous abortion) → expectant, medical management, D&C/E (3 choices)
- TAB (therapeutic abortion) → expectant, medical management, D&C/E (3 choices)

Q3. Maternal death?
- Yes
- No
- Unknown

Q3. Extract from medical record:
- If maternal death occurred (yes/no/unknown)

Q4. If answered “Yes” for Q3:
- Date of maternal death? (DD:MM:YY)

Q4. Extract from medical record:
- If maternal death, date of death (DD:MM:YY)

Q5. If answered “Yes” for Q3:
- Cause of death
  - COVID-19
  - Obstetric hemorrhage
  - Hypertensive disorder (including preeclampsia and eclampsia)
  - Pregnancy-related infection
  - Abortion/ectopic pregnancy
  - Other direct cause (obstetric complications)
  - Indirect cause (pre-existing medical condition exacerbated by pregnancy)
  - Coincidental cause (e.g. motor vehicle cause, accidental injury, assault)
  - Unknown

Q5. Extract from medical record:
- If maternal death, cause of maternal death (COVID or other causes, document as appeared in medical record)

---

**Module 4: Birth Characteristics**

**What:** Information related to labor and delivery/birth and other data collected on the day of birth

**When:** To be asked on or soon after the day of birth, at enrollment if enrollment occurs postpartum, or directly extracted from chart

<table>
<thead>
<tr>
<th>Questionnaire-based data collection</th>
<th>Medical record data extraction</th>
</tr>
</thead>
</table>
| Q1. Date (and time, if available) of birth (DD:MM:YY) (HH:MM) | Q1. Extract from medical record:
  - Date of birth (and time of birth, if available) (DD:MM:YY) (HH:MM) |
| Q2. Where was the infant born? *  
  - Home  
  - Birthing facility/hospital  
  - Other location, please specify | Q2. Extract from medical record:
  - Location of birth:
    - Hospital (indicate which hospital)
    - Other (specify location, if delivery did not occur at this facility)
    - “NA” if unknown |

* If your registry collects only hospital-based births, please record “facility/hospital” for all records
<table>

Module 7: Biospecimens and Diagnostic Testing

What: Biological specimens collected from mother and infant during pregnancy, at delivery, and postpartum, with a focus on indicators of vertical transmission of COVID-19.
When: Maternal biospecimens collected during the pregnancy, at the time of delivery, or after delivery, as well as biospecimens collected during delivery and from the infant at birth and during the first 6 weeks of life.
<table>
<thead>
<tr>
<th>Questionnaire-based data collection</th>
<th>Medical record data extraction</th>
</tr>
</thead>
</table>
| **Q1.** Were any biospecimens collected for COVID-19 diagnostic testing from the mother during pregnancy, at the time of delivery, or in the postpartum period? | **Q1.** Extract from medical record:  
- Any biospecimen/diagnostic testing for the mother? (Y/N) |
| **Q2.** If answered “Yes” to Q1: **→** Proceed to maternal biospecimen table below | **See Q2 Maternal Biospecimen Table below** |
| **Q3.** Were any biospecimens collected for COVID-19 diagnostic testing at the time of the delivery? | **Q3.** Extract from medical record:  
- Any biospecimen/diagnostic testing at delivery? (Y/N) |
| **Q4.** If answered “Yes” to Q3: **→** Proceed to delivery-related biospecimen table below | **See Q3 Delivery-Related Biospecimen Table below** |
| **Q5.** Were any biospecimens collected for COVID-19 diagnostic testing from the infant? | **Q5.** Extract from medical record:  
- Any biospecimen/diagnostic testing for the infant? (Y/N) |
| **Q6.** If answered “Yes” to Q5: **→** Proceed to infant biospecimen table below | **See Q3 Infant Biospecimen Table below** |

### Q2. Maternal Biospecimen Table

<table>
<thead>
<tr>
<th>Sample Number (as needed)</th>
<th>2a. Date of Biospecimen Collection</th>
<th>2b. Type of Biospecimen</th>
<th>2c. Type of Testing Conducted</th>
<th>2d. Qualitative Results</th>
<th>2e. Quantitative Result (e.g., viral load)</th>
<th>2f. Specify units for Quantitative Results</th>
</tr>
</thead>
</table>
| SM1. DD:MM:YY             | • Nasopharyngeal swab  
• Vaginal swab  
• Feces/rectal swab  
• Maternal blood  
• Breast milk  
• Pregnancy tissue (in the case of fetal demise/induced abortion)  
• Other, specify | • Viral PCR  
• IgM  
• IgG  
• Other, specify | • Positive  
• Negative  
• Other, specify | ___ | | |
| SM2.                      | | | | | | |
| SM3.                      | | | | | | |
| SM4.                      | | | | | | |

### Q4. Delivery-Related Biospecimen Table

<table>
<thead>
<tr>
