

Table 2. Interaction between living with one unemployed parent and sexual minority status on the risk of suicide attempt (n = 10,033)

	<b>No unemployed parents/ carers</b>	<b>One unemployed parent/ carer</b>	<b>RR (95% CI) for living with One Unemployed Parent/ carer within strata of Sexual Orientation</b>
	<b>RR (95% CI)</b>	<b>RR (95% CI)</b>	
Heterosexual	1.00	1.65 (1.09-2.48)	1.65 (1.09-2.48)
Sexual Minority	2.92 (2.22-3.86)	4.64 (3.09-6.98)	1.59 (1.03-2.44)
RR (95% CI) for Sexual Minority within strata of living with one Unemployed Parent/ carer	2.92 (2.22-3.86)	2.82 (2.03-3.92)	

Measure of interaction on additive scale: RERI (95% CI) = 1.08 (-0.54-2.69), *P* = 0.13

Measure of interaction on multiplicative scale: RRs (95% CI) = 0.96 (0.62-1.49), *P* = 0.83

RR: relative risk. CI: confidence interval.
