

**Errata:** Establishment of the Measurement Properties and Clinical Interpretation of the Family Reported Outcome Measure (FROM-16)

This correct final version of the thesis includes the following corrections to Table 6.4 and associated text, which were not recorded in the previously available version in ORCA:

Table 6.4, page 240, mean overall EQ-5D utility values “0.500 (SD=0.331, Min=-0.484)” in the final version replaces values “0.725 (SD=0.195, Min=-0.040)” in the previous version.

Table 6.4, page 240, mean utility values of “0.483 (SD=0.329, Min=-0.484)” for Europe, “0.502 (SD=0.326, Min=-0.484)” for North America, and “0.571 (SD=0.349, Min=-0.349)” for the Rest of the World in the final corrected version replace “0.724 (SD=0.193, Min=-0.040)”, “0.717 (SD=0.193, Min=-0.040) and 0.754 (SD=0.210, Min=0.095)” in the previous version.

Table 6.4, page 240, the mean overall utility value for male/female, “0.556”/“0.483” in the final corrected version, replaces “0.755”/“0.715” in the previous version.

Table 6.4, page 240, the mean utility values for Europe, North America, and the Rest of the World for male/female, “0.520”/“0.471”, “0.572”/“0.488”, and “0.643”/“0.526” in the final corrected version replace values “0.737”/“0.720”, “0.769”/“0.707”, and “0.792”/“0.730” in the previous version.

Table 6.4, page 240, under column ‘Existing health condition Yes/No’, mean overall utility values “0.464/0.516” in the final corrected version replace “0.709/0.732” in the previous version.

Table 6.4, page 240, under column ‘Hospitalised for COVID-19 Yes/NO’, mean overall utility values “0.440/0.515” in the final corrected version replace “0.685/0.735” in the previous version.

Table 6.4, page 240, column headings “Existing health condition- Yes/No” in the previous version is replaced as “Existing health condition/Mean score-Yes/No” in the final corrected version; “Hospitalised for COVID-19-Yes/No” in the previous version is replaced by “Hospitalised for COVID-19/Mean score-Yes/No” in the final corrected version and “Male/Female” in the previous version is replaced by “Gender/Mean score-Male/female” in the final corrected version.

Page 236, paragraph 4, the sentence, “The survivors had a mean overall EQ-5D utility value of 0.500, with Europeans having a significantly lower utility value (0.483) than those from the rest of the World” in this final corrected version replaces the sentence “The survivors had a mean overall EQ-5D utility value of 0.725 with North Americans having a significantly lower utility value (0.717) compared to those from Europe and rest of the World” in the previous version.

Page 251, paragraph 4, page 254, paragraph 1, and page 259, bullet 4, mean overall utility value “0.500” in the final version replaces the value “0.725” in the previous version.
