PACS number(s): 43.66.Ba, 43.66.Dc, 43.66.Pn, 43.10.Vx [PFA]

Equation (2) is incorrect, and can be substantially simplified. It should read

$$BMLD = 10 \log_{10} \left[\frac{k - \cos(\phi_s - \phi_m)}{k - \rho} \right],$$

where $k = (1 + \sigma_e^2) \exp(\omega_0^2 \sigma_\delta^2)$.

Equation (3) is not needed. The predictions are not materially affected.
